

Muskrat: (23 parcels)

Muskrat's shoreline is 30% natural, 9% minimally altered, 43% moderately altered, and 17% greatly altered. There was a significant increase in the number of docks, while the number of boat lifts, motorized and non-motorized boats saw decreases. The number of waterfront structures remained constant between the surveys, but the 2020 survey saw a significant decrease in decks.

Sands: (6 parcels)

Sands has remained mostly undeveloped with 83% of the shoreline being natural. Surveys have been conducted on Sands in 2020, 2011 and 2006. Since 2006, Sands has seen increases in the number of docks and personal watercraft such as motorized and non-motorized boats and it has seen decreases in the number of boat lifts. The 2006 survey showed 1 boat launch as the only lakeside structure and no lakeside structures have been recorded in the most recent surveys.

Fox: (76 parcels)

Fox's shoreline is 23% natural, 17% minimally altered, 39% moderately altered, and 18% greatly altered. The last survey conducted on Fox Lake was done in 2004. In that survey, waterfront structures were not counted for. Waterfront equipment, aside from personal watercraft and motorized boats, were also not recorded. Since the survey in 2004, there has been a slight increase in personal watercraft on the lake and a decrease in the number of motorized boats.

Meadow: (10 parcels)

Meadow's shoreline is composed of 40% natural shoreline, 20% minimally altered, 30 percent moderately altered, and 10% greatly altered. The campground on the south east end of the lake marks the only greatly altered parcel. There has been a significant decrease in the number of storage sheds and decks in the shoreline impact zone. The number of boat launches has increased by one with the addition of the boat launch at the campground. Since the last survey, there have been significant increases in the number of docks, motorized boats and non-motorized boats. Meadow Lake has seen decreases in the number of boat lifts over the last decade.

Johnson: (26 parcels)

Johnson is still a mostly natural lake with 62% of the shoreline being natural. The rest of the shoreline consists of 23% minimally altered, 12% moderately altered and 8% greatly altered. In the last decade, Johnson lake has seen increases in the presence of storage sheds, boat launches and decks in the shoreline impact zone. Johnson lake has also seen changes in the amount of waterfront equipment on the lake as well. The most notable changes are increases in the number of docks, motorized boats and non-motorized boats.
